the past year and more been Assistant United States Marshal at the Capital, left our city yesterday for Cleveland, Ohio. leaves many friends here, he hav ing always, as an officer, as a member of the press, and as a citizen, exhibited the courtesies, energies and amenities of life to a high degree.

Fire in Edgefield. At half-past twelve o'clock last night the fire fiend was at its destructive work in Edgefield. The grocery store of Messrs. Cox & Brothers, on Woodland street near the corner of Hickory was in flames. The building, with all its contents, consisting of a large stock of groceries, etc., was totally destroyed. The loss is quite heavy to the owners. We understand that they are insured, but to what amount or in which company, we

did not ascertain. City Funds Under Garnishment. claims against the city, Messra Guild & Smith have attached by garnishment that portion of the city's finances on deposit at the Third National Bank. At the meeting of the Common Council yesterday after-noon, Mayor Morris made some suggestions as to what course was best to pursue in this emergency. The Council adopted a resolution authorizing the Mayor and Finance Committee to take such legal action as they might think proper in this case of attachment or any other matter in | ber. which they may think such action required.

Free Bridge Items. The Free Bridge movement gives rise considerable talk, in which all classer of citizens seem to take part. We have never known a proposition to meet with more general favor, and a little strange to say that the people of Nashville are just as anxious for its construction as those on the other side of the river. It may be that they are tired of being cut off from the en-chanting views which are to be found be-yond the Cumberland.

We heard it stated yesterday that the Edgesield and Kentucky Railroad would subscribe \$10,000 toward the proposed free bridge. It has been pretty generally known for some time past that this com-pany intended at no very distant day to locate their depot on the other side of the river, but in that event would want free transportation across the Camberland. Hence the proposition to subscribe \$10,-

Col. Abert, the Government Surveyor having control of the improvements in the Cumberland, was waited upon yesterday by the Edgefield Board, and respec fully requested not to destroy the founda-tions of the old bridge site until it was determined where the Free Bridge would be

A committee from the Edgefield Board of Aldermen are in correspondence with Mr. Flannery, the well known stone bridge builder, with a view of receiving specifications and bids.

It is proposed to make the new bridge fifty feet wide, sufficient for street car and all other purposes. The Directors of the Saspension Bridge refused to accept the proposition from the Street Railroad, offering \$500 per annum for ten years, for the privilege of crossing. The friends of the free bridge movement are glad that they refused.

American Fries vs. Spanish Files and Shoo-Files Generally, Our clever and esteemed friend Wm. B. Ewing, Esq., recently found upon his farm on White's Creek, a peculiar species of beetle. It is evidently of the ganns Can-tharis, to which belong Spanish flies, potato flies, and a number of others, all valpable in medicine for their powerful vesicating properties. The peculiarity of this specimen is its extraordinary size, being from two to three times the length of its spanish relative. It is of fine appearance, with brilliant enamel colors, green and crimson, and seems to be a new variety. Unfortunately only one was found, otherwise its powers as a vesicant or blistering agent would speedily be tested, and if it should prove to be as superior in this respect as it is in looks, it would doubtless soon become chief of its tribe. We hope he may find them in sufficient quantities to prove them, and if "the 'Squire" can ultivate them as successfully as he has his farm, the Spanish fly may yet be out-ranked by an American fly. The speci-men is at the drugstore of J. C. & W. H.

West Broad Street Improvements The bill appropriating \$800 for grading and filling West Broad street having passe three readings in the Foard of Aldermen, here it originated, was yesterday adopted by the Common Council, and now only requires the signature of the Mayor to render complete. The work will be commenced as soon as possible, in order to have it done before the commencement of the fall Fair. Then, the continuation of what is to be known as West End Avenue being finished, there will be a broad, smooth and safe drive from the river to the Fair Grounds. These Broad street improvements will obviate the existing chances

for the occurrence of accidents, and make that much frequented thoroughfare look a | the United States Commissioners. great deal more lovely than at present. The Hanging at Cleveland. The Knoxville Press and Herald has the following additional particulars of the banging at Cleveland: We learn the folowing statement in relation to the hanging of the negro boy in Cleveland, last Friday night, from a gentleman who resides in Cleveland, and is a zealous advocase of Republicanism: He says that the cause which led to the hanging of the negro was on account of his attempting to commit a rape. That the young lady and the negro were both exemined by Dr. Mc-Nabb, a practicing physician of Cleveland, who stated that a rape had been attempted upon the lady. In relation to the "Ku-Klux hanging the negro," our informant says it is not so; that the actions of the

party were endorsed by all good citizens in that community, irrespective of color or political sentiments.

Whig, of the 21st inst., writing from Nashville, thus speaks of the State Library and our peerless Librarian: I visited the State Library, containing 19,000 volumes. I am indebted to Mrs. Gen. Haskell, the Librarian, for her courtesy and kindness. Under her supervision many improvements have been introduced, which the sluggish taste of man would not have suggested. When andsome ladies have the supervision of libraries men grow literary, and what was dull indifference to books now sees worlds of beauty and interest either in the books

weather, the attendance at Mill Creek Church was large, and the entertainment was of the most enjoyable character. An extra train left the Chattanooga depot at 8 o'clock, which carried up a goodly number of persons. Stopping at the South Mash-ville station, a delegation of the fair was added to the crowd and the jump to Mill added to the crowd, and the jaunt to Mill Creek was altogether very agreeable. A number of young ladies from this city had volunteered their services to take part in the concert, but owing to the unfavorable weather they took it for granted that the entertain-

ment would be postponed, and hence the audience was deprived of the pleasure of hearing the many sweet voices in concert. While this was a disappointment, the menagers determined to do the best that could be done under the circumstances Mr. E Reese, of this place, was fortunately among the visitors from this city, and was immediately pressed into service upon his arrival. He presided at the piano, which he touched with a master hand. In addition to the music the entertainment was made up of tableaux, charades, etc. The tableaux comprised "The daughter of Herodius dancing before the King," "Fairyland," "The Widow Mahoney," "Peri at the Gates of Paradise," "Boaz and Buth," "The Italian Victors," "All Jones among the Rosses." Vintage," and "Love among the Roses," interspersed with character that were amusing and entertaining. Miss Sallie Tankesley and Miss Bettie Lyle were com-missioned as the leaders in the manage-

ment of the whole affair, and right wel

did they succeed. Mrs. Goff rendered

valuable service, as she always does on

such occasions, and without her the enter-tainments in that neighborhood would pass off dull indeed. We are requested to state that the concert and tableaux will be repeated next Tuesday night, when the singers will certainly be present. Associational Meetings. The Newspaper Reporter says: Some people, ignorant of what good editing is, imagine the getting up of selected matter to be the easiest work in the world to do, whereas it is the nicest work that is done on a paper. If they find the editor with cissors in hand, they are sure to say, "Eh! that is the way you set up original matter, eh!" accompanying their new and witty questions with an idiotic wink or smile. The facts are, that the interest, the morality, the variety and assfulness of a paper. depend, in no small degree, upon its seected matter, and few men are fully capable of the position who would not them-selves be able to write many of the articles they select. A sensible editor desires con siderable selected matter, because he knows that one mind cannot make so good

a paper as five or six. Arrest of Mail Robber.

On the strength of a dispatch from the United States Marshal at Decatur, Ala, a man named D. R. Snelling, who arrived here at 6 o'clock last evening, was arrested at the Decatur depot. He says that about a year since he took a letter out of the postoffice containing \$300 for a certain person to whom he had instructions to deiver the money. Mr Snelling says that he has not since been able to find the woman, and attributes his arrest to the circumstance stated. He asserts his innoence of any intentional crime, and appears surprised that any order should have been given for his arrest. He was sent to jail to await a hearing to-morrow before

Stealing Milk.

Several gentlemen residing near the city nform us that here lately their cows come up at night more completely milked than when they left in the morning, not being able to give enough lacteal fluid to pay for the trouble of obtaining it. The circumstance gives rise to the terrible suspicion that a new form of thieving is about being introduced in this locality, for the punishment of which the Code makes no adequate provision. A person so destitute of the milk of human kindness as to be guilty of such felonious milking of the cows of others, would not hesitate long to steal the cows also, but for the greater certainty of being caught in the latter transaction.

We noticed yesterday a healthy looking pear tree on the premises of one of our well known citizens, who resides on High street, and our attention was attracted to a cluster of four pears on the same limb The owner of the tree was admiring the large growth and beauty of the fruit, which, by the way, was the species known as the Bartlett, and taking one from the cluster, found that it weighed 11 ounces. How will that do for a city pear?

Tall and Tallest Millet An agricultural friend on Jones' creek in Dixon county, sends us a fine specimen of millet, measuring six feet in height. Major DeMoss, of Bell View, was yesterday among our visitors, and brought us a stalk of millet out at the farm of his neighbor. Dr. Carter, which measures exactly eleven teet in height. How is that for higher?

The river was stationary at this point yesterday, with 14 inches on Harpeth Shoals. Westher cloudy and rainy. A Mobile paper says Capt. W. M. Eanes, who is still living, was second clerk on a boat when the Tom Big-Bee was dug, which

is a wild piece of exaggeration.

The St. Louis Democrat of Wednesday says: "The river steadily fell yesterday t same rate of sixty inches per month. To Cairo an improvement in channel, depth 5 feet 10. Freight plentiful on the apper rivers, and boats not moving fast ough to move it with satisfactory speed. Missouri is becoming very low. Much trouble is about to be encountered there. Ohio river again falling; the decline is faster than in any other river. The Ohla is ower than since 1854. Cairo to Memphis there is seven and a half feet on the Mis sissippi. The Tennessee is quite low."

The current of the Mississippi is cutting

the banks away opposite St. such rapidity that the people of that city are slarmed, and are taking steps to put a stop to it. Some seventy scres of land from the Illinois side inst shows the of Bloody Island, and on the Missonri side near the shore deposits of sand and mud threaten to render the water so shallow as to be useless for a barge and lumber raft landing. Immense sums of money have already been expended to protect the harbor of St. Louis and keep the river within its proper channel, and large outlays will

vet be necessary to keep it in good order. STATE OF THE WEATHER

Synopsis for the past twenty-four hours-The high barometer which was Wednesday afternoon on the New England coast has extended south ward with increasing pressure, and is now off Cape Hatteras. South and southeasterly winds have been re-ported during the day from South Carolina to Maine, with cloudy and variable weather. Light local rains have been re-ported from New Jersey; and rain fell last night at most of the stations northeast of Georgia. Smoke and haze still con-tince from Michigan to New York; and only light showers were reported last night from the lower lakes. Cloudiness has incressed very generally in Mississippi and the Ohio Valley, and a severe local storm is now reported from Southern Illinois. Probabilities. - The barameter will prob ably continue to fall along the entire Atlantic coast, with a rising temperature and light southwest winds from Virginia and Kentucky to New England. The condi-tions will be favorable for local storms over this small area to-night and Friday. The barometer will probably continue high, with clear and pleasant weather, on
